

NAME:

Cellular Neurobiology 2018-19

Final Exam example

- Provide a brief definition of the following terms: (2x6p)

THERANOSTICS.....

.....

.....

NISSL STAINING.....

.....

.....

MORPHOLINO KNOCKDOWN.....

.....

.....

DENDRO-DENDRITIC SYNAPSE.....

.....

.....

VESICULAR TRANSPORTER.....

.....

.....

FACS (Fluorescence-activated.....)

.....

.....

- Answer to the following questions with a brief description (10 lines maximum) or by making a scheme:

1) Compare the features of classical and unconventional neurotransmitters (3p)

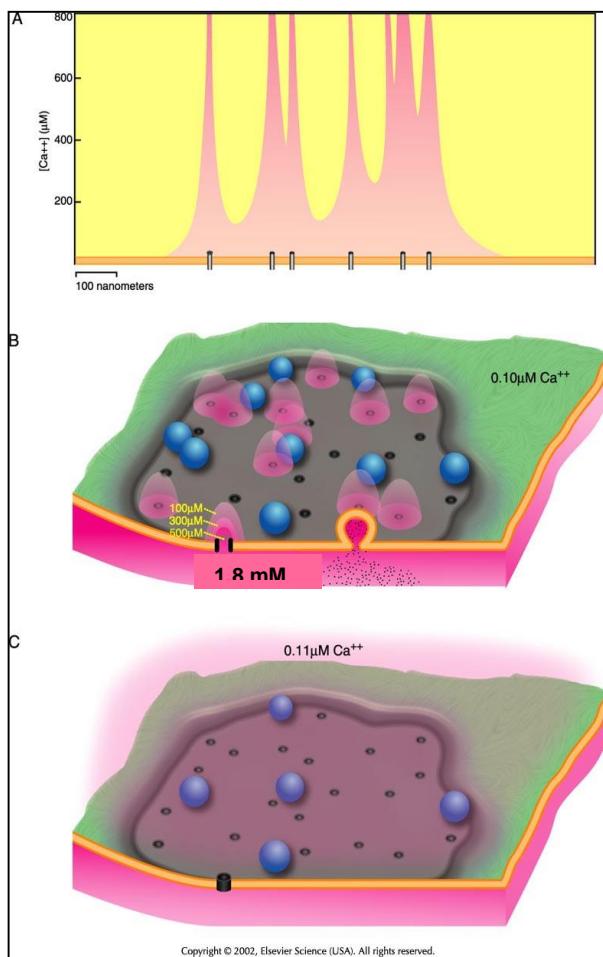

.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....

2) How can we study mRNA sub-compartmentalization and transport? (4p)

.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....

3) List the main steps involved in astrocyte reaction (astrocytosis/astrogliosis) with a brief description (3p)

- Please describe and comment the following figure related to the pre-synaptic terminal (4p)

- Please describe and comment the following figure related to the induction of genetic mutants in zebrafish (4p)
