

Advances in label-free and fluorescence microscopy

June 26th 2018, Politecnico di Torino
Aula Consiglio di Facoltà, corso Duca degli Abruzzi 24, Torino

09.45 Registration

10.20 Welcome

10.30 Vibrational spectroscopy in life sciences: from prosthetic materials, to cells, to tissues
Valter Sergio (Università di Trieste)

11.10 High-plex single cell analysis in immunofluorescence on human tissue
Maddalena Bolognesi (Università di Milano Bicocca)

11.50 Optical mapping of the brain

Francesco Pavone (Università di Firenze & LENS)

12.30 Lunch Break

13.30 Imaging of embryonic development with optical tomography
Andrea Bassi (Politecnico di Milano)

14.10 Moving from Confocal Microscopy to Super-Resolved Microscopy

Giuseppe Vicidomini (Istituto Italiano di Tecnologia, Genova)

14.50 Complementary information from super-resolution fluorescence microscopy and label-free techniques
Stefano Fumagalli (Istituto Mario Negri, Milano)

15.30 Final Remarks

**POLITECNICO
DI TORINO**

Sponsored by

Organization

Emiliano Descrovi
Cristiano Rumio

Attendance is free. For logistic reasons, a registration is kindly requested through the following link:
